Scorpius Trackers on signing spree

NT Bureau

Chennai, July 12:

Scorpius Trackers officially announced the signing of more than 1,250 MW of Tracker Supply MOUs with one of India's largest Independent Power Producer (IPP), an established EPC and another Open Access Solar Park Developer.

Commenting on the launch, Founder and CEO Shailesh Vaidya said, 'With these innovative tracker solutions and with our aggressive marketing strategies for selling our solution globally, we are poised to grow leaps and bounds in achieving PM's vision on Make in India. We already are a company of standing which aptly fits in the 'Start Up India' campaign as being promoted by the Indian government'.

Speaking on the occasion, CTO and co-founder Kiran Shah said, 'Being an innovative technology driven start-up company anchored by a small but highly capable technical product development team, we are confident of taking on challenging problems and developing cost-effective and reliable technology solutions which will last a long time, thereby making it a very attractive investment for the customer. This will allow for lower cost of electricity which will finally benefit the nation'.
